Terminal Disclaimer

The terminal disclaimer filed on 3/22/05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent 6,714,303 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Reasons for Allowance

Claims 75-99 allowed.

As to claims 75-88, the prior of record, taken alone or in combination, fails to disclose or render obvious a method for determining interaction of at least one species with a plurality of individual zones of a sensing surface by repeatedly varying the incident angle and/or wavelength of the light and simultaneously measuring the intensities of light reflected from the sensing surface and the momentary incident angle and/or wavelength of the incident light to correlate each image to a specific incident angle and/or wavelength, in combination with the rest of the limitations of claim 75.

Art Unit: 2877

As to claims 89-99, the prior of record, taken alone or in combination, fails to disclose or render obvious an analytical system comprising means for repeatedly varying the incident angle and/or wavelength of the light and means for **synchronized** optical detection of images in the image plane and incident angle and/or wavelength of light illuminating the sensing surface, in combination with the rest of the limitations of claim 89.
